System Description

Multi-Carrier Management

Carrier Connect API/Carrier Cloud for SAP®:
Functional scope of the carriers offered

AEB

Legal notice

Certain functionalities described herein or in other product documentation are available only if the software is appropriately configured. Depending on the product series, software is configured either in consultation with your AEB representative or with the help of documentation obtained from your AEB representative. Details are set forth in your agreement with AEB.

"AEB" always refers to the company with which you as a customer have entered into the agreement in question. This is either AEB SE or any majority-held subsidiary of the same. An overview of these companies can be found on our website www.aeb.com. Any exceptions to this rule are identified by specifically naming the company in question.

The program may only be used in accordance with the conditions set forth in the license agreement.

Brands

Brands in this product information are not explicitly marked as such, as is the norm in technical documentation:

- Adobe, Acrobat, Reader, Experience Manager Forms, and AcroForms are brands or registered trademarks of Adobe Systems Inc.
- HTML and XML are brands or registered trademarks of W3C, World Wide Web Consortium, Massachusetts Institute of Technology.
- TIBCO Jaspersoft Business Intelligence Suite is a brand of TIBCO SOFTWARE INC.
- Java and Oracle are registered trademarks of Oracle Corporation.
- Microsoft Windows, Microsoft Word, Microsoft Excel, and MS SQL are registered trademarks of Microsoft Corporation.
- NiceLabel, Designer Pro, and Designer Express are brands or registered trademarks of NiceLabel / Euro Plus d.o.o.
- Salesforce, Sales Cloud, and others are trademarks of Salesforce.com, Inc.
- SAP and SAP S/4HANA are trademarks or registered trademarks of SAP SE.

All other product names are assumed to be registered brands of the respective company. All brands are recognized.

All information contained herein is non-binding and for information purposes only.

Copyrights

All rights, especially copyrights, are reserved. No part of this product information or the corresponding program may be reproduced or copied in any form (print, photocopy, or other process) without the written consent of AEB. This product information is provided solely to customers of AEB for their internal use in conjunction with software licensed from AEB. This information may not be shared in any form with third parties, except the employees of the customer, without the written consent of AEB, and then also exclusively for use in conjunction with software licensed from AEB or AFI Solutions GmbH (AFI GmbH).

AEB Add-ons for SAP®: use of AEB product code

Maintenance and development may at any time cause changes to the standard system's internal programming. For this reason, the customer is prohibited from programming in such a way that addresses internal programming functionalities (such as in the SAP® object code). This restriction does not extend to documented code designed to facilitate customer use, such as an interface for accessing product functionalities.

Contents

1   General information

All carriers listed in this system description are available in the *Carrier Connect* portfolio as of April 29, 2025.

Carrier types

For the integration in *Carrier Connect*, a distinction is made between the two carrier types "standard carrier" and "project carrier". Each carrier is assigned to one of these categories.

💡 For details about how the carrier types differ from each other as well as all other details about the functional scope of *Carrier Connect* refer to the system description.

Country-specific connections

The carrier connections in *Carrier Connect*, usually are country-specific connections since different specifications, contacts, company codes, and approval processes etc. apply.

💡 You will find the permitted country of dispatch in brackets behind the service provider name. Some connections are valid globally, Europe-wide, or even for several countries of dispatch.
Examples: TNT Express (Italy), DB SCHENKERair (Germany), FedEx Express (EMEA), or Logwin (global).

Hazardous goods

In those cases in which managing hazardous goods is possible, it has been indicated at the respective transport service provider under "Special notes".

》 Note: Please note that fields in *Carrier Connect* are provided for population by the customer. The type and number of fields varies and depends on the respective transport service provider. Entering, checking, releasing, or maintaining the field contents is not part of the services provided by AEB. These processes are part of the Customer's business transactions. AEB draws the Customer's attention to the fact that the Customer is always responsible for performing due diligence and complying with the law in its business transactions. This particularly applies to the handling of hazardous goods transports. AEB is not liable for the actual use of the software by the Customer.
