

AEB

Software Developer in Říčany

For over 40 years, AEB SE has developed software to support the global trade and logistics processes of businesses in the industrial, commercial, and service sectors. AEB has more than 500 employees working in Germany and at its international offices.

We're looking for software developers to expand our development center in Říčany and provide long-term support to our team there. You'll be a part of the local Software Infrastructure team, developing the base framework and underlying structure of the software that our product teams use.

What we offer

You can expect a diverse and exciting range of assignments around the AEB products of tomorrow:

- Opportunity to work with Java, current web technologies, and SQL/NoSQL databases
- Gradual exposure to the world of AEB and its products
- Integration of AEB solutions into existing IT environments, especially the AEB Cloud
- Creative extension of applications and workflows
- Stable, quality-oriented development and maintenance of the software base

AEB gives more ...

- Ongoing personal and professional support
- Five weeks of vacation per calendar year
- Professional development opportunities, including German and Czech language courses
- Option of up to six months of training in Stuttgart, Germany
- Flexibility due to laptop and work-at-home option
- Annual performance-based bonus for all company employees

What you offer

As a Software Developer, you have the following background and skills:

- Successful completion of your studies in computer science, software engineering, or a comparable education
- Programming experience in object-oriented programming languages, ideally Java
- Experience in medium-sized and large IT projects.
- Enthusiasm about tackling even tricky problems
- Process-oriented approach and organizational initiative
- Openness to taking on a wide range of tasks and winning over others for your solutions
- Contact and communication skills in English – and ideally, German and/or Czech
