

Making things happen with software – that's what drives us.

First, for the benefit of our customers:

By empowering them to evolve with the times, continually reinvent themselves, and transform powerful ideas and business models into reality. With cloud-based software that brings global trade and logistics together – software that is already helping over 5,000 businesses.

Beyond that, we also want our software to make a positive contribution to society:

By making supply chains leaner and greener, more secure and equitable. And by using the profits that AEB earns to make a difference in society. That's why we allocate part of our annual profits to fund the AEB Foundation, which promotes educational projects for disadvantaged persons.

Founded in 1979: Over 40 years' experience in global trade, logistics, and IT.

Installations in over 35 countries. Users in over 75 countries.

More than 500 employees who give their all to achieve better supply chain performance.

It's the perfect combination: AEB products with SAP® integration.

Employee-owned and owner-operated.

Modern APIs and integration into various ERP and CRM systems.

Over 5,000 customers who put their trust in our products and solutions.

Over 15 years in the cloud.

Customs Management

Optimizing your customs processes with end-to-end IT integration and smart automation: For example, during export and import filing in ten, respectively six European countries or with a broker integration. Or while using free trade agreements, when managing supplier's declarations, and when maintaining non-preferential master data.

- **Product Classification**
- **Export Filing and Import Filing**
- **Customs Broker Integration**
- **Supplier Declaration Exchange**
- **Origin & Preferences**
- **EMCS Filing**

Trade Compliance Management

Optimum protection against all export-related risks without compromising the efficiency of your shipping processes: With AEB software that covers all the main elements of embargoes and export controls.

- **Compliance Screening**
- **License Management**
- **Export Controls**
- **Product Classification**
- **Risk Assessment**

Intralogistics

Comprehensive logistics support in warehouse management and shipping: For efficient distribution processes with high-quality service – and above all for satisfied customers.

- **Warehouse Management**
- **Loading Dock Scheduling**
- **Carrier Connect**
- **Shipping**
- **Logistics Cost Management**

Transport & Freight Management

This is how you control your carriers and parcel services today: With software from AEB that supports you all the way from selecting to commissioning and invoicing to transport partners. Transparency across the complete delivery process included.

- **Shipping**
- **Logistics Cost Management**
- **Carrier Connect**
- **Monitoring & Alerting**
- **Freight Cost Management**

Supply Chain Collaboration

Collaborating successfully in the supply chain means optimally integrating your supply chain partners into your processes and providing the necessary transparency. AEB software supports efficient data exchange and provides the information you need – for proactive and retrospective action.

- **Loading Dock Scheduling**
- **Monitoring & Alerting**
- **Carrier Connect**

AEB Cloud Platform

The cloud platform for your tailored logistics solutions in an ever-changing world

The AEB cloud platform is based on the thoroughly proven standards of the AEB cloud products. Based on this, we develop a tailor-made solution for your processes and users thanks to business process modelling.

The result is a user experience that focuses on the users and their tasks. This not only makes work easier, but also reduces mistakes, increases efficiency and motivation.

And it can be easily and flexibly adapted to new requirements in order to make the most of the potential of permanent change.
