## New AEB white paper: Successful IT-integration of carriers and parcel services – even across borders

Five tips for IT-based collaboration with carriers and parcel services

Leamington Spa, 16<sup>th</sup> January 2017 - The opportunities for synchronising supply chains between businesses and across borders are promising. But many businesses are struggling to integrate transport partners into their IT environment. AEB, a leading provider of supply chain logistics software, has published a white paper that offers valuable information on this very subject. Titled “Five tips for IT-based collaboration with carriers and parcel services”, the white paper can be downloaded free of charge at <https://www.aeb.com/uk/media/white-paper-carrier-integration.php>.

For many IT and logistics managers, synchronising internal and external logistics processes remains a dream. The challenges seem too daunting and the costs too prohibitive: a lot of IT resources are tied up in pooling the requirements of all the different departments and service providers, introducing an end-to-end data and process structure, and implementing decision-making processes for internal or external data management.

So what is the key to IT-based collaboration with transport partners? A new white paper by AEB gives an overview of the advantages and disadvantages of various methods of IT-based collaboration with carriers and highlights the associated challenges. It also provides a handy checklist that helps businesses to ascertain whether IT integration offers a potential benefit for them.

Claire Umney, General Manager at AEB, said: “The opportunities and competitive advantages of a well-functioning, IT-based collaboration with transport service providers – cost savings, greater data transparency, and higher customer satisfaction – should not be dismissed lightly. Even small steps, such as linking individual parcel services to your in-house IT or automating manual processes, can pay off. Our new white paper contains five important tips for IT-based collaboration that we hope will help businesses to successfully integrate transport service providers in processes and system environments – even internationally.”

The white paper “Five tips for IT-based collaboration with carriers and parcel services” can be downloaded free of charge at <https://www.aeb.com/uk/media/white-paper-carrier-integration.php>.
